

## CFD Trading 95% Lose - How To Win

Everybody starts out in CFD Trading wanting to make money but a whopping 95% of Traders lose, which leaves 5% winners. So what is it that the 5% of CFD Traders are doing to make them win in CFD Trading. What are the mistakes that the 95% of people are making, and how can you avoid them!

One of the major reasons that so many people lose when it comes to CFD trading is that they believe they have a sure fire winning CFD trading system or CFD robot that is going to make them rich. The first thing to take from this is that making money from CFD Trading is not easy, and it does take some skill.

Think about this for minute if it was so easy to win, everybody would be CFD Trading and if a Robot was so successful would you in fact sell that robot? Probably not! More often than not people that develop these CFD Robots sell them and this is how they generate their income and not from CFD FX REPORT. So be very careful when it comes to buying a CFD Robot especially off the back of all the claims they make.

The second group just don't understand the unique skills you need to win and they have the following misconceptions:

If they work hard they will win but effort counts for nothing in CFD trading, just being right does and this means you have to work smart - not hard.

Some people believe that they need to have a highly complicated trading system to be successful, however the opposite is more likely, the less complicated the better.

Another portion of this group, believes the myths that can be found all on internet which include:

- Scalping and day trading is a way to make massive money
- You can predict CFD markets in advance
- Buy low sell high is a great way to make money
- CFD markets move to science and a mathematical theory

There are many more and the above are just a few myths.

This group wants to put in effort but they do so in the wrong areas and lose, because they simply get the wrong CFD education.

How to be successful

To learn to trade CFD is easy anyone can learn a logical robust system that can make gains but that is not all you need for success - you need the right mindset to apply it and this means trading with discipline. It is not just matter following these systems.

Discipline is the key to success and you have to understand that you will have losing streaks, so you must stick to your rules and trading plans.

Discipline comes from the right CFD education and having confidence in your trading plan. For further educational information feel free to visit the CFD FX REPORT, as they have a lot of educational information and can help you find the best CFD Broker.

To be a successful CFD Trader you don't have to just work hard, work smarter, use simple systems and have discipline.
