

Robots Versus Humans: What will make you money faster and safer with Forex.

Trading on the Forex market has become increasingly trendy over the last few years and with it comes a question "Who wins in the battle of Forex Robots versus the human trader?" and the answer is it is not even close. The Forex Software Robots have built in features that will end its human counterpart on many levels in this article I will show you why if you are not using a Forex Robot chances are you are trading water.

1. The human condition. The conundrum with us humans is we have a quantity of characteristics that give the Forex Robots a gigantic edge as it comes to competing on the Forex market. Simple little things like the need to rest, the need to intermingle with other humans and the need to eat are the first few that quickly jump to mind. Your Forex Robot can run twenty four hours a day seven days a week without having to worry about stuffing its stomach or getting some face time or the wasteful endeavor known as sleep.

2. Emotion. Emotion is a very terrifying thing when it comes to day trading and competing on the Forex market. All of a sudden a combine of successful transactions and you feel like hero and make mistakes that you would normally never make. Afterward there are the days as everything seems to hit rock bottom so out of fear you make a few Forex trades to hopefully rescue your day and chances are it is not going to work. The Forex Robot does not have any emotions evidently so it can just focus on what is valuable like the numbers and the trends which in the end pay off much better than a revved up human who is acting from his or her gut.

3. Reliability. The person who is going to be thriving on the Forex marketplace is the one who consistently makes the right decisions and choices. If you are skillful of focusing on the Forex market twenty four seven than you will be alright but needless to say this is not viable. Judgment such as how am I going to pay the electric bill or what am I going to make for dinner or why do the Oakland Raiders seem to take pleasure from sucking will kill any sort of uniformity that you may perhaps have. Again the Forex Robots are designed to do one matter and that is make constant skilled decisions that will make you money in the Forex market.

All of the folks on the edge of society have been telling us for years that one day robots are going to run the planet and as it comes to the Forex marketplace they are probably right. Us poor humans are terrific at a lot of things but when you throw in a five second attention span, emotions that screw everything up and the crave to eat and sleep in the end the Forex Robots are going to keep on winning and keep pulling in steady profits. It is time to throw in the towel.
